

# Assignment-1

Name : Kasthuri Anusha

Email id : <u>kasthurianusha755@gmail.com</u>

Batch : July 2023

Trainer : Punith sir

Topic : Right shift & Left shift

(Bitwise Operator)

# **BITWISE OPERATOR**

In Bitwise operator there are 7 different operations can be performed. In that we have to discuss two of bitwise operator. They are

- 1.Right Shift Operator
- 2.Left Shift Operator

These operators operates on the binary format of a number.

## **Right Shift Operator (>>):**

We know that shift operators are operates on binary format of a number. For example 8

Here, when we apply right shift of 8 then it **move one bit right.** 

```
Right shift of 8 by 1 - 00000100 (Now it is 4)
Right shift of 8 by 2 - 0000010 (Now it is 2)
```

So, the right shift of 8 by 1 becomes 4, right shift of 8 by 2 becomes 2.

# **Left Shift Operator (<<):**

Let us take one Example is 2

Here, when we apply left shift of 2 then it **move one bit left.** 

```
Right shift of 2 by 1 - 0 0 0 0 0 1 0 0 (Now it is 4)
Right shift of 2 by 2 - 0 0 0 0 1 0 0 0 (Now it is 8)
```

So, the right shift of 2 by 1 becomes 4, right shift of 2 by 2 becomes 8.

#### Write a java program using Right Shift operator?

```
class RightShift
{
    public static void main (String []args)
    {
        int a=8;
        System.out.println("Right Shift of 8 by 1 is " +(a>>1));
        System.out.println("Right Shift of 8 by 2 is " +(a>>2));
    }
}
```

### **Output:**

```
Microsoft Windows [Version 10.0.22621.1848]
(c) Microsoft Corporation. All rights reserved.

C:\Users\ANUSHA KASTHURI\OneDrive\Desktop\Java at Kodnest>javac RightShift.java

C:\Users\ANUSHA KASTHURI\OneDrive\Desktop\Java at Kodnest>java RightShift
Right Shift of 8 by 1 is 4
Right Shift of 8 by 2 is 2
```

#### Write a java program using Left Shift operator?

```
class LeftShift
{
    public static void main (String []args)
    {
        int a=2;
        System.out.println("Right Shift of 2 by 1 is " +(a<<1));
        System.out.println("Right Shift of 2 by 2 is " +(a<<2));
    }
}</pre>
```

#### **Output:**

```
C:\Windows\System32\cmd.e × + \
Microsoft Windows [Version 10.0.22621.1848]
(c) Microsoft Corporation. All rights reserved.

C:\Users\ANUSHA KASTHURI\OneDrive\Desktop\Java at Kodnest>javac LeftShift.java

C:\Users\ANUSHA KASTHURI\OneDrive\Desktop\Java at Kodnest>java LeftShift
Left Shift of 2 by 1 is 4
Left Shift of 2 by 2 is 8
```
